## FAQ

*Do I have to upgrade SitePro 3.0?*  
**Answer: YES**

*My satellites are 10+ years old, should I upgrade them?*  
**Answer: With proper care satellites can last 15 years or more. If your satellites are in good working order and well maintained this is an effective upgrade!**

*How long will my system be down for the upgrade?*  
**Answer: The process will take more than two days and involve running the system in standalone mode during the conversion.**

*When will installation take place?*  
**Answer: The installation can be planned around your requirements.**

*Do my satellites now have new satellite warranty?*  
**Answer: One Year warranty applies on the components replaced.**

*What can I do with the removed LTC Plus Components?*  
**Ask your sales representative! He will put together a buyback program.**
