## TORO 835 AND 855 SPRINKLER:

**Count on it.**

**Toro has done it again!** Toro has been the leader of new technology in the irrigation industry since 1970. With the new 835 and 855 series sprinkler flexibility and control have been redefined.

- Reliability:** Smooth rotation for extended life  
3 times the lightning protection  
Steady piston valve reduces system damage
- Durability:** Debris resistant nozzles  
Duraseal protects against contamination  
Debris trap prevents contamination and damage  
Pilot valve protection reduces replacement
- Performance:** Exact flow and spray uniformity  
Reliable rotation speeds provide more control  
Precise pressure regulation  
High pop-up clears traller grasses  
Unidirectional rotation ensures uniform coverage
- Lowest cost of ownership:**  
Fewer parts saves time and money  
Removable rock screen is easy to service  
Stainless steel valve seat  
Upgrade easily with future products
- Flexibility:** Trjectory adjustment allows for 7-30 degree adjustment of main nozzle  
Part and full circle in 1 sprinkler  
Back nozzle capable  
Selectable pilot valve for less parts

## SitePro 2.0:

**Count on it.**

The best just got better! SitePro has been upgraded and its' new features will make controlling your irrigation system even easier. With these easy to use features SitePro 2.0 is a great time saving tool that will allow you to do more with less.

### Features:

#### Schedule Activity Screens:

You can now print this screen in a short time and also review only the items you are concerned about. i.e. satellites, stations or programs.

#### Program review screens:

Now you can manage your entire system from 1 screen! Review and adjust all functions affecting your system. i.e. programs, on/off of individual programs, percentage adjust, start times, repeats and soaks, station times and daily schedules.

#### Flow ramp:

Now 10 steps and up to 30 minutes to reach full flow

To the nearest second timing of stations

Reset all percentage adjust to 100 % with 1 button

Expanded multi-manual functions

#### Pump Station Integration with Reflow:

SitePro will now re-calculate your irrigation system based on a reduction of available flow.

About Us

## TORO 835S/855S Series

Radius: 52' - 97' • Flow rate: 13.7 - 60.1 GPM  
40° - 330° part and full-circle

### Features and Benefits

- Trjectory™ Adjustment of the main nozzle - 24 positions from 7°-30°.
- A Toro patented exclusive, puts water where you want it with on-the-spot precision.
- Ratcheting riser, another Toro exclusive, allows you to adjust the riser position in the body with no disassembly required.
- Arc Adjustment - 40°-330° and true full-circle in one sprinkler.
- The industries largest and most flexible nozzle selection provides precision application.
- Spike-Guard™ Solenoid's 20,000 volt lightning rating is nearly 3 times that of the competition.
- Durability, Reliability and Serviceability.

## TORO DT34/DT54 Series & DT35/DT55 Series

Radius: 55' - 95' • Flow rate: 14 - 60 GPM  
Full-circle (360°) • 40°-330° part and full-circle

### Features and Benefits

- Dual Trjectory™ Adjustment of the main nozzle - 25° or 15°.
- Conversion Assemblies: upgrade your existing Toro Golf Sprinklers with a full line of DT Series conversions.
- A full and part-circle drive in one allows you to fine tune the watering area from 40°, 330° and a true 360° unidirectional full circle sprinkler.
- Constant Velocity drive is a time proven water lubricated, full circle, planetary gear drive that utilizes a variable stator design to provide 3 minute rotation times for a complete full circle revolution.
- The largest nozzle selection in the industry provides precise application rates.

## TORO NEW Toro® Network VP® Field Satellite

Now easily improve your course's watering efficiency and simplify your job at the same time, with Toro's incredible new Network VP Field Satellite. The Network VP combines flexibility, greater capacity, easier user interface and increased programmability in a single control unit, along with other advanced capabilities. Designed for drop-in replacement of Network 8000 Field Satellite, the uniquely modular Network VP automatically communicates with SitePro software for seamless upgrading to as many as 64 stations. This puts you in total control of your watering.

## TORO E-Series™ OSMAC® Field Satellite

16 to 64 stations in eight-station increments, Smart OSMAC stand-alone operation, programmable narrow band decoder modules.

### Features

- A larger station count, offering up to 64 stations when used with SitePro central software.
- Stainless steel (painted) and bi-wall plastic cabinet configurations.
- Run up to 6 solenoids.
- Colored LED indicators to confirm 24, 9- and 5-volt power to various boards within the cabinet makes troubleshooting a snap.
- Simple self-testing by sliding a switch, or more in-depth field diagnostics are available (with a 9-pin adapter and laptop link).
- Enhanced surge protection lowers operation costs.
- Uses automotive fuses that are readily available for serviceability.
- Patented Hot Post for each eight-station module.
