## Three Money Saving Reasons for Using Toro EdgeMax™ Bedknives!

### Performance Benefits

The EdgeMax™ bedknives are made of a harder material that stays sharper longer, allowing for a crisper cut. The corresponding reel blade wear difference is negligible between standard and EdgeMax™ bedknives. With bedknives and reels that maintain their sharpness, your equipment incurs less wear enabling it to work smoothly and efficiently. The result is enhanced quality of cut that keeps your greens and fairways looking better over longer periods of time.

### Time Savings

EdgeMax™ bedknives provide significant reduction in maintenance time, allowing customers to focus on their turf rather than equipment upkeep. EdgeMax™ bedknives do not need to be sharpened as often, reducing the overall time spent backlapping, grinding, installing and adjusting bedknives.

### Cost Advantage

Toro testing has shown that EdgeMax™ bedknives last up to twice as long as standard bedknives. Some customers have reported even better results! Additionally, the extended-life benefit is greater with a 14-blade reel than 11-blade reels. Of course, wear results will vary based on cutting unit setup, turf conditions and maintenance practices. The combination of longer life and reduced maintenance time equate to long-term cost savings.
