Introducing Toro® Titan™ Tines.

The Longest lasting tines
you can buy.

It's a fact: Toro Titan Tines last 24% longer than the next leading competitor's brand. Not surprising. Brazed joints and a special tungsten carbide blend allow for maximum durability. An incredibly strong alloy material and a unique heat treat process mean longer wear. With over 100 tines available in multiple varieties, there's one to fit most OEM models.

KEEP IT 100% TORO TOUGH

Frequently Asked Questions...

Q. Do Toro Titan tines fit other manufacturers' aerator models?

A. Yes, Toro Titan tines will fit most John Deere® and Jacobsen® aerators. Please reference the fit up chart located in your Titan Tine catalog. Mounting size of the tine should be used to match dimensions of aerator tine head. We also offer two sleeves to convert Titan 3/8" mount tines to 1/2" and 5/8" mounting sizes used on most Ryan products. Contact your Toro distributor for more information.

Q. Why are there so many varieties of tines?

A. We offer such a wide variety to give customers the greatest flexibility in aeration choice. Every customer has a unique soil situation and variety provides the opportunity to choose a tine best suited for your need.

Q. Where are Titan™ Tines made?

A. All materials and components including packaging of Titan tines are manufactured in the USA exclusively for Toro.

Titan: One of prodigious size, strength, or achievement.

TORO Count on it.

Titan Tines are the longest lasting tine on the market...

New TITAN™ Tines Offer...

More Choices:

- Over 100 new tines provide multiple aeration choices
- Available in Quad, Hollow, Side-Eject, Shaped or Solid
- Titan™ Max designed with long lasting carbide tip

Better Performance:

- Thin wall design allows for maximum core pulling and superior hole quality
- Optimized core removes more thatch for maximum top dressing
- Superior hole quality improves recovery time and maintains and speeds up playability

Higher Productivity:

- Standard Titan™ tines last approximately 2-3 times longer than previous Toro® tine version—and Titan™ Max lasts 18 holes or more!
- Field comparison tests prove Titan Max tines lasted 19% longer than leading Competitor B and 24% longer than leading Competitor A

Increased Durability:

- Tough tungsten carbide blend tip design maintains consistent aerator depth and reduces costly changeouts
- Durable brazed tip joint for strong bond and resistance to separation and breakage
- Unique manufacturing process and advance technology allows for thinner wall tine while maximizing durability and performance

Mount size compatible with most other brands of equipment

Improved design increases the ability to pull a better core

Lengths available to fit many applications

Thin wall for maximum core pulling

Durable-brazed joint

Tough tungsten carbide blend tip (Titan Max Only)

Sharp cutting edge optimized for cutting into turf

Count on it.

Titan™ tines fit all current and late model Toro® aerators. Standard mount size fits most other brands of equipment. Check mounting size to ensure compatibility.
