

The new look in aerators.

If you think the Toro® ProCore 648 looks unique, you're right. From the innovative wheels within the coring path, to the large 48" (122 cm) aeration swath, there's nothing ordinary about Toro's newest aerator. Years of research, customer input, testing and attention to detail went into making the ProCore 648 the most productive and efficient walking aerator on the market.

ONE WORKSHIFT • ONE MACHINE
Aerate 18 greens in about 7 hours.

INNOVATIVE REAR WHEEL PLACEMENT

The wheels are located in front of the aeration head so they do not drive over the freshly aerated turf and run over the cores.

TRUECORE™ GROUND FOLLOWING

The TrueCore™ sensing system automatically maintains tine depth on the fly to match the ground undulations providing consistent coring depth of up to 4".

DEEPER, HIGH QUALITY HOLES

RotaLink™ geometry allows the tines to enter and exit the ground cleanly leaving a high quality result.

SERIES/PARALLEL 3-WHEEL DRIVE

The patented 3-wheel series/parallel traction drive, combined with high-torque, low-speed wheel motors, prevents slippage for reliable traction and even hole spacing.

Count on it.

Titan:

 One of prodigious size, strength, or achievement.**TORO****Count on it.**

Titan Tines are the longest lasting tine on the market...

New TITAN™ Tines Offer...

More Choices:

- Over 100 new tines provide multiple aeration choices
- Available in Quad, Hollow, Side-Eject, Shaped or Solid
- Titan™ Max designed with long lasting carbide tip

Better Performance:

- Thin wall design allows for maximum core pulling and superior hole quality
- Optimized core removes more thatch for maximum top dressing
- Superior hole quality improves recovery time and maintains and speeds up playability

Higher Productivity:

- Standard Titan™ tines last approximately 2-3 times longer than previous Toro® tine version—and Titan™ Max lasts 18 holes or more!
- Field comparison tests prove Titan Max tines lasted 19% longer than leading Competitor B and 24% longer than leading Competitor A

Increased Durability:

- Tough tungsten carbide blend tip design maintains consistent aerator depth and reduces costly changeouts
- Durable brazed tip joint for strong bond and resistance to separation and breakage
- Unique manufacturing process and advance technology allows for thinner wall tine while maximizing durability and performance

Mount size compatible with most other brands of equipment

Improved design increases the ability to pull a better core

Lengths available to fit many applications

Thin wall for maximum core pulling

Durable-brazed joint

Tough tungsten carbide blend tip (Titan Max Only)

Sharp cutting edge optimized for cutting into turf

**Count on it.**

Titan™ tines fit all current and late model Toro® aerators.
Standard mount size fits most other brands of equipment.
Check mounting size to ensure compatibility.
